

CODE: P750207
Item: Pedestal PO 2

PRODUCT TECHNICAL SPECIFICATION

Description: The pedestal can be used as a platform for installing polyester enclosures. It is possible to use in environments such as dry, humid, exterior, interior, environment characterized by acid vapors, etc. **Installation of the pedestal is done by digging into the ground.** The pedestal does not require maintenance.

No.	Code	Dimensions (mm)			Material	Appliance class	Flame-retardant	Color	IP	IK	Packing	Product weight (g)	Barcode
		a	b	c									
1	P75-02-07	560	235	1100	SMC	Klasa II	V0	RAL 7035	65	10	1	13,00	 8605031041446

Other characteristics

Body material: Reinforced glass-fiber polyester (SMC), which made it enable the strength of the materials to be resistant to mechanical impacts, UV radiation, temperature alternations, non-flammability and dielectric strength of the enclosures.

Mounting by: Digging into the ground
